Can the instructor take this test?: Yes

Number of Test Items: 100

Time allowed (minutes): 75

Passing score (percent): Contact credential source. DANB uses computer adaptive testing (CAT) to present questions to candidates. Each candidate starts with a question at or around the pass point. If the candidate gets a question correct, the next question will be slightly harder. If the question is incorrectly answered, the next question will be slightly easier. Question selection takes into account the content of the question, as each candidate is presented with the same percentage of questions from each domain on the exam outline. Using this method of testing, DANB can more accurately pinpoint a candidate’s ability level. The average candidate will get around 50% of the questions correct and around 50% of the questions incorrect. The candidate’s score is based on the difficulty of the questions that were answered correctly.

Cost Per Test: $270 traditional candidate; $265 active military; Discount provided when exam is bundled with other exams.

Additional information:

• Q Test Site: Starting January 20, 2021, DANB introduced online proctoring for this exam delivered through DANB’s testing vendor Pearson VUE’s OnVUE system. Candidates must have a computer and testing space that meet Pearson VUE’s requirements. Computer must have webcam, microphone, secure, reliable internet and other technical specifications. The testing space must at least be a walled room with a closed door. See https://home.pearsonvue.com/danb/onvue for more information.
