

Curriculum Development Team Training

Instructional Scenario

Title Ideas: Internet Fundamentals and Elementary School Students

Duty/Concept Area(s): 6670 73-80/Exploring Internet Fundamentals

Scenario One:

Your FBLA chapter is working with a local elementary school to introduce technology. Explore why the Internet was developed and create a presentation explaining your findings. Create an interactive activity for the elementary students to complete after the presentation.

Big Question:

- What is the Internet?
- Why is important now, and how does it influence our everyday activities?

Focused Questions:

- What age group will you be teaching?
- What type of technology is appropriate to introduce to them?
- How in-depth can you get with the details?
- What will they already know?
- How will you find something inclusive that will appeal to all ages, genders, and nationalities?

SOL Correlation:

English 9.5, 10.5
